Github: github.com/SannidhiSriram-06
Portfolio: sannidhisriram-06.github.io/

Email: sannidhisriram8@gmail.com
Mobile: +91-9182137828
Hyderabad, India

SKILLS

Languages: Python (scripting & automation for DevOps), Bash
Cloud: AWS (ECS Fargate, EC2, ALB, ASG, IAM, CloudWatch, S3, ECR, VPC, CloudFront, Systems Manager, Backup, Client VPN), Azure (App Service, Azure OpenAI, Monitor, Entra ID, Storage Accounts, Virtual Machines)
Infra & IaC: Terraform, Docker
CI/CD: GitHub Actions, Git, Snyk
Dev Tools: Cursor, Antigravity, Claude Code, Gemini CLI
Soft Skills: Cross-functional coordination, Self-directed execution, Clear technical communication

EXPERIENCE

Infosys Springboard | AI Intern — Cloud Deployment Lead | Remote, BFSI | [GitHub](#) Feb – Mar 2026

- Led cloud deployment for a 25-member cohort (AI/ML, full-stack, and cloud sub-teams) building a BFSI-sector AI KYC verification system, following Agile methodology with sprint planning, daily standups, and retrospectives.
- Evaluated SageMaker and Lambda against EC2 for the ML service, selecting EC2 for cost efficiency, no cold-start overhead, and full deployment control; deployed the React/Vite frontend to S3 and Flask ML service to EC2.
- Managed Git workflow and repo access across the cohort, resolving deployment-stage issues (CORS origin mismatches, localhost-to-EC2-IP reconfiguration, PM2 process management, IAM permission errors) to keep the pipeline stable.

PROJECTS

Cloud Support Ticket Simulation | AWS SSM, Client VPN, CloudWatch Logs Insights, AWS Backup | [GitHub](#) Jul 2026

- Simulated a scoped-access support engagement using two IAM identities (environment owner and a permissions-limited support analyst), resolving 2 simulated incidents (service outage, data-loss recovery) via remote access (SSM Session Manager, AWS Client VPN) without SSH keys or standing admin access.
- Diagnosed a simulated outage by isolating a Security Group misconfiguration from application health using CloudWatch Logs Insights and internal-vs-external reachability checks, avoiding a false assumption of application crash.
- Executed an AWS Backup restore end-to-end, surfacing and documenting a real backup-timing/consistency gap between job completion status and actual data capture, verified via direct inspection of the restored instance.

Observability Fargate | Prometheus, Grafana, ECS Fargate, Terraform | [GitHub](#) Apr 2026

- Deployed a containerized observability pipeline on AWS ECS Fargate (zero EC2) with Prometheus scraping metrics and Grafana visualizing them across a 3-panel dashboard (HTTP requests, 5-minute request rate, active time series).
- Provisioned the full AWS stack — multi-AZ VPC, security groups, IAM roles, ECR, CloudWatch log group — via Terraform with zero manual console intervention.
- Configured a Grafana alert rule that fires when the 5-minute request rate exceeds a defined threshold, evaluated every minute, simulating real-time SRE incident detection.

Self-Healing Microservice | Docker, Terraform, AWS, GitHub Actions, Snyk | [GitHub](#) Feb 2026

- Built a four-layer self-healing system on AWS — health-check endpoints, ALB traffic isolation, and Auto Scaling Group instance replacement — to auto-recover from failures without manual intervention.
- Provisioned a multi-AZ VPC, load balancer, and Auto Scaling Group via Terraform, enabling CPU-based scaling between 2–4 instances under load.
- Built a GitHub Actions CI pipeline integrating Snyk to scan and block vulnerable images pre-push, with image deployment to EC2 handled manually post-build.

CERTIFICATIONS

OCI 2025 Certified DevOps Professional Oracle Certificate	Sep 2025
OCI 2025 Certified Observability Professional Oracle Certificate	Aug 2025
OCI 2025 Certified Multicloud Architect Professional Oracle Certificate	Aug 2025
OCI 2025 Certified Generative AI Professional Oracle Certificate	Aug 2025
Microsoft Certified: Azure AI Fundamentals (AI-900) Microsoft Certificate	Jun 2025
Microsoft Certified: Azure Fundamentals (AZ-900) Microsoft Certificate	Jan 2025

ACHIEVEMENTS

- Ranked Top 500 Globally in Oracle Race to Certification 2025.

EDUCATION

Lovely Professional University B.Tech — Computer Science and Engineering; CGPA: 7.32	Phagwara, Punjab Aug 2023 – May 2027
Keshav Smarak Junior College Intermediate (PCM); Percentage: 77.5	Hyderabad, India Apr 2021 – Mar 2023
Oxford Grammar School 10th Grade; Percentage: 84.6	Hyderabad, India Apr 2020 – Mar 2021
